

Quick Start Guide

BeamView-USB™ With LaserCam-HR™

Found New Hardware Wizard

Welcome to the Found New Hardware Wizard

Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site [with your permission]. [Read our privacy policy.](#)

Can Windows connect to Windows Update to search for software?

Yes, this time only
 Yes, now and every time I connect a device
 No, not this time

Click Next to continue.

Found New Hardware Wizard

This wizard helps you install software for: Coherent LaserCam-HR Camera

If your hardware came with an installation CD or floppy disk, insert it now.

What do you want the wizard to do?

Install the software automatically [Recommended]
 Install from a list or specific location [Advanced]

Click Next to continue.

Hardware Installation

The software you are installing for this hardware: Coherent LaserCam-HR Camera

has not passed Windows Logo testing to verify its compatibility with Windows XP. [\[Tell me why this testing is important.\]](#)

Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.

11 Click "Continue Anyway" on this screen.

Found New Hardware Wizard

Completing the Found New Hardware Wizard

The wizard has finished installing the software for:

Coherent LaserCam-HR Camera

Click Finish to close the wizard.

12 Click "Finish" to complete the LaserCam-HR installation.

If you are asked to reboot, do so at this time to complete the installation process. If rebooting is not required, installation is now complete.

BeamView-USB™ With LaserCam-HR™ Quick Start Guide
 © Coherent, Inc. 11/2009. Printed in the U.S.A.
 Part No. 1086147, Rev. AE

This guide explains how to install the BeamView-USB™ software. For detailed information about the LaserCam-HR™ camera, refer to the *LaserCam-HR User Manual* (1126917).

For instructions on how to connect additional LaserCam-HR cameras to USB 2.0 PC ports, refer to either the *LaserCam-HR User Manual* (1126917), or the BeamView-USB software Help file.

Do not connect a LaserCam-HR camera to a USB 2.0 PC port at this time. The software must be installed before physically connecting a camera to the computer.

Unpacking

The LaserCam-HR is a digital CMOS camera, designed for use with a USB 2.0 interface. The camera, trigger cable, rotational camera mount, and CD-ROM are shipped in a high-density plastic carrying case. This specially-designed case protects all items during shipment.

Visually check all cartons for damage before unpacking. If there is no visible external damage, remove all items from the cartons and inspect them for damage. Immediately advise Coherent of any damage. A Returned Material Authorization (RMA) will be issued for any damaged instruments (refer to the last page of this guide for contact information).

When inspecting a LaserCam-HR camera, remove only the protective cover, *not* the LDFP (Low Distortion Faceplate). See the following figure.

Software Installation

Do not connect a LaserCam-HR camera to the USB 2.0 PC port before starting the following installation.

1 Insert the BeamView-USB CD into your CD-ROM drive. If Autorun is enabled on your system, installation will start automatically; otherwise, select Run from the Start menu and then type **D:\Setup** (substitute the appropriate letter of your CD-ROM drive for **D**).

2 Click the "No-Questions-Asked Installation" button.

3 Read the License Agreement and then click the "Yes, I do" button.

4 Click the "Thanks" button. BeamView-USB installation is now complete.

A shortcut to BeamView-USB will automatically be placed on the desktop. Do not click it at this time.

Connect a LaserCam-HR camera to the USB 2.0 PC port before continuing with the installation.

5 When the Found New Hardware Wizard appears, select "No, not at this time" and then click "Next."

6 Select this radio button and then click "Next."

7 Click "Continue Anyway."

8 Click "Finish" to close the Wizard.

Installing a LaserCam-HR camera requires the Found New Hardware Wizard to run twice—the next step is the beginning of the second cycle.
